Dear Dean and the Bioflow team

I would just like to take a minute to thank you for the difference that you have made to me and my practice.

Using my hands all day treating patients and especially athletes, who require a lot of soft tissue work, has taken its toll on my hand and wrist joints, resulting in ongoing stiffness and aching in these joints. Often after a heavy day I would get sharp pain from my thumbs and a constant ache in my wrists.

I was given a Bioflow magnetic bracelet as a present earlier this year. I would not normally wear any kind of jewellery however, I can honestly say that after a day of wearing this bracelet, I have not felt any sharp pain, stiffness or aching in my hand or wrist joints since!

This has made an unbelievable difference to me and my practice. Any patient or practitioner out there who suffers with stiff and/or achy joints or is serious about the health of their joints should definitely be using a bioflow magnetic device for prevention and pain relief.

Thank you!

Kind regards

Dr Simon Lawson
